CALIDRIS

The wide waistbelt and leg loops of the CALIDRIS provide all the comfort, support and ventilation needed for long aid routes and other activities requiring extended periods of hanging (cleaning and equipping routes...). Lightweight and comfortable, with large gear-carrying capacity, it is perfect for big wall climbing. The CALIDRIS is sized to fit larger users for all types of climbing.

Short Description Comfortable and ventilated adjustable harness for extended periods of hanging

Selling Points

- FRAME Construction technology:
 - bias webbing transfers load and distributes pressure over entire surface area of the waistbelt and leg loops
 - flat webbing reinforcement in waistbelt and leg loops offers increased comfort when hanging
 - ergonomically-shaped leg loops and waistbelt
 - breathable mesh exterior, closed cell perforated foam padding, and polyester 3D polyester mesh provide maximum ventilation, optimal balance between size, weight and comfort
- DoubleBack buckles on leg loops allow size to be easily adjusted:
 - when wearing different thicknesses of clothing, suiting the climber's individual body shape
 - while hanging for greater comfort (loosening the leg loops increases the rise, increasing the load on the waistbelt)
- Two DoubleBack buckles allow waistbelt to be adjusted and secured in a single movement
- Dual waist buckles allow tie-in point to be centered and equalize the equipment loops on each side
- Two sizes cover wide range of body shapes/sizes
- Multiple options in the front and back for organizing and carrying gear:
 - four equipment loops
 - wide haul line loop
 - two CARITool tool holder slots on sides
- Green belay loop is easily identifiable for connecting a belay/rappel device
- Reinforced tie-in points for increased durability in this high-wear area
- Detachable rear leg loop elastics

Specification

- Material(s): high-strength polyester webbing, polyethylene/EVA foam, perforated closed cell foam, 3D woven polyester mesh, monofilament nylon mesh
- Certification(s): CE, EN 12 277 type C, UIAA 105
