LASER SPEED

Ultra-high performance ice screw for strategic placements where ease of placement is key. The lighter steel tube of the LASER SPEED improves durability. The integrated folding crank gives an optimized lever, making it easier and faster to screw in.

The drill shape gives excellent starting and facilitates screwing.

Better handling and screwing speed thanks to the ergonomics of the aluminum hanger and its integrated crank. One-handed use: the screw starts with a single quarter turn.

Short Description Ultra-high performance ice screw with integrated crank

Selling Points

- Easy screwing:
 - steel tube for easy bite and screwing in any conditions
 - lighter tube and optimized threads for increased durability
- Easier bite:
 - the shape of the drill is optimized to facilitate bite into the ice
- Easier drill sharpening with the drill's patented sharpening reserve
- Quick and easy screwing:
 - integrated flexible crank provides excellent grip and an optimized lever, making it easier and faster to screw in
 - compact hanger to facilitate screwing into sculpted ice
 - color-coding facilitates identifying the length of a screw

Specification

- Material(s): steel tube and drill, aluminum hanger
 - Certification(s): CE, UIAA (except for the 10 cm version)
-
