Category	Helmets
Subcategory	PERFORMANCE climbing and mountaineering helmets

SIROCCO®

The SIROCCO is designed to respond to the needs of climbers and mountaineers for reduced weight and for protection. Its head-covering shape, lower in the rear, offers reinforced protection. Optimized volume on the head, along with excellent ventilation, provide maximum comfort.

Head-covering shape, lower at the back of the head for reinforced protection against lateral and rear impact.

Short Description Ultra-lightweight climbing and mountaineering helmet with reinforced protection

Selling Points

- Ultra-light design:
 - only 170 g
 - hybrid construction with a shell in EPP (expanded polypropylene) foam and rigid crown injected with EPS (expanded polystyrene) foam
- Head-covering design for optimal protection against lateral and rear impact
- Maximum comfort in action:
 - wide holes, for excellent ventilation
 - completely adjustable, thanks to the adjustable headband and chinstrap
 - magnetic buckle facilitates fastening the chinstrap (Petzl patent)
 - compatible with the VIZION eye shield
 - two hooks and rear elastic for attaching a headlamp

Specification

- Material(s): expanded polypropylene (EPP) shell, polycarbonate crown, expanded polystyrene (EPS) liner, polyester webbing
- Certification(s): CE EN 12492, UIAA
- Product comes with protective storage bag and spare foam
